- 2 INDEPENDENT CLAIM 1
 - 2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.
Document D1 discloses (the references in parenthesis applying to this document):
an inking and doctor unit for a rotogravure print and spread cylinder, comprising a casing (52);
a doctor assembly; (64,67,70,73) and
an inking chamber (54) bounded by a concave inner surface (figure 2) of the casing

wherein
the casing and the doctor assembly form a box body closed (clo. 7, lines 24-29)
except for one side engaging a print cylinder (3);
the doctor assembly comprises a doctor (73) mounted to lie flat with respect to a
lateral surface (5) of the print cylinder (3), when the box body (figure 2) engages the

3 DEPENDENT CLAIMS 2-22

- 3.1 Despite claim 19 is drafted as an independent claim (PCT Guidelines 5.15), claim 19 contains all the features of claim 1 and has been therefore considered as dependent of claim 1.
- 3.2 Dependent claims 2 to 22 do not seem to contain any additional feature which, in combination with the features of any claim to which they refer, involve an inventive step (Article 33(1) PCT). All these features are known per se or form part of the prior art used for the corresponding purpose (see the International search report). Furthermore these features concern only constructional developments solving independent problems without producing any surprising effect which would result from their combination.
